TAMA STAR BUBINGA

Lacquer Finishes

STAR is the flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance.

STAR Bubinga features a much thinner shell than Starclassic Bubinga. In addition, every shell comes equipped with 9mm thick Sound Focus Rings (SFR) for structural support. This shell configuration provides clear projection and resonance to highlight the distinct sound of Bubinga.

Lacquer Finishes

STAR is the flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance.

Walnut has long been favored by furniture makers for both its beauty and durability. As a drum shell material, Walnut's naturally EQ'ed tone has been praised by the drum community for both the stage and the studio. The STAR Walnut shells project booming low end with enough cut to be heard through any mix.

Exotic Finishes

In the '80s TAMA's Superstars and Imperialstars reigned supreme - the perfect drums for the times. But TAMA's builders and designers wanted something that transcended trends, something timeless - drums that understood a player's passion and allowed the expression of every genre, style, mood, and technique. They created Starclassic Maple drums...and ignited the thin-shell revolution. And now the new Exotic Finish line offers beautiful, one-of-a-kind exotic wood exteriors for that extra luxurious touch. Numerous options are available to meet the varied and critical needs of professional drummers including a selection of more than 30 different shell sizes. Starclassic Maple also features three shell hardware finishes to choose from: Black Nickel, Chrome and Smoked Black Nickel. Starclassic Maple is simply an unprecedented combination of sight and sound.

For more than 30 years, the distinctive, traditional sound of birch has made it the go-to choice for numerous pro drummers. Now, TAMA takes birch in an entirely new direction. Proportionately melding inner plies of bubinga with the classic birch exterior, TAMA has created a blended shell that combines the focused attack of birch, with the enhanced low-end of bubinga—delivering totally a new sound—both dynamic and versatile.

S.L.P. DRUM KITS - STUDIO MAPLE

Lacquer Finish

The Studio Maple kit is designed with 100% Maple shells that are fitted with TAMA's Sound Focus Rings on the shell interior, as well as 100% Maple wood hoops on all shell exteriors. Using Maple extensively throughout the drum set, lets this kit speak with a rich and dense sonic voice, full of warmth and articulation. TAMA's innovative Direct Flexi-Mount system is also incorporated into this kit. This is a two-piece, hinged tom bracket design that controls the amount of saturated sustain and allows for clear tonal separation throughout the toms. While great for performing live, this model really excels in a studio environment, especially in musical settings calling for thick, rich, and warm sounds.

S.L.P. DRUM KITS - FAT SPRUCE

Lacquer Finish

The Fat Spruce kit features 100% Spruce shells, which is an uncommon wood for use in drums, but highly regarded for use in instruments like acoustic guitar for its warmth, response, and resonance. The drum community embraced spruce's tonal attributes after TAMA released the S.L.P. Fat Spruce snare drum in 2017. Spruce's sonic profile offers a naturally balanced tone with a very warm and smooth mid-range frequency. The distinctive and swirling Fat Spruce wood grain pattern adds a layer of visual complexity and beauty. TAMA opted to outfit the toms with die-cast hoops, which promotes tonal clarity and a focused attack. This kit is very well-suited for organic music styles, including Indie Rock, R&B, Blues and Jazz.

S.L.P. DRUM KITS - DYNAMIC KAPUR

Lacquer Finish

The Kapur kit features 100% Kapur shell, which is a relatively new drum shell material. Sonically, Kapur delivers an open, lively and warm sound with outstanding projection. TAMA paired the Kapur with its Sound Arc Hoops to offer plenty of attack with moderately controlled overtones for sonic clarity during intricate tom patterns. Because of its articulate sound and enhanced attack, The Dynamic Kapur kit works very well for funk, fusion and gospel. The high volume dynamic potential also lends itself perfectly to rock genres.

SUPERSTAR HYPER-DRIVE DUO

Lacquer Finishes

TAMA's new Superstar Hyper-Drive Duo design gives drummers a new voice to inspire them to explore original and creative rhythmic phrases. The key component of this series is the 10" x 14" snare drum, which TAMA dubs the "Duo Snare." This drum's unique attributes enable it to perform as a conventional floor tom and as an extra-deep sounding snare drum. Mounted on floor tom legs, the 10" deep by 14" diameter drum is fitted with a conventional snare strainer; engaging the strainer and snare wires converts the floor tom into a fully functional snare drum with a deep tonal quality. Drummers can position the drum as a first floor tom, or off to the side of their hi-hat for a more specialized approach. These options allow for new unique phrasing options and a fresh voice within the traditional drum set configuration.

SUPERSTAR CLASSIC MAPLE

Lacquer Finishes

For more than forty years, the Superstar name has stood for groundbreaking design, superior build quality, sterling tone, and clear projection. Superstar Classic once again upholds tradition by raising the bar for discerning drummers—and remarkably—does it while also lowering the price. Drawing on Superstar of the past, its classic TAMA T-shape badge and streamlined low-mass single lugs point to the simpler state of art of the 70's, while the ingenious Star-Mount system and new thinner gauge 100% maple shells eclipse anything in its class.

IMPERIALSTAR

Unicolor Wrap Finishes with Black Nickel Shell Hardware

With over 40 years of drum building experience, TAMA knows what drummers really want. With this in mind we sought out to design an affordable yet durable kit that retained many high-end features you'll find in our Silverstar, Superstar, and Starclassic lines. What we came up with was Imperialstar. Every aspect of the modern drum kit was exhaustively examined, reexamined, and then improved before it was accepted as part of the Imperialstar design.

CLUB-JAM

Lacquer Finish

We are proud to offer a new compact kit – the "Club-JAM" Kit. This kit adopts some ideas from vintage kits, such as a cymbal holder mounted directly on the bass drum shell and curved bass drum spurs, further setting it apart from the typical compact kit.

Focused yet deep sound from Mersawa / Poplar hybrid shell is just right for small and intimate gigs. Its compact size and configuration make it ideal for working drummers, and it fits comfortably on just about any stage.

PRACTICE TOOLS

Our unique practice tools make your percussive education more enjoyable and productive.

PRACTICE PAD

TSP10

TAMA's 10" practice pad is a single sided rubber pad. The rubber portion is wrapped around a wooden board for a natural, bouncy feel. Slightly thicker soft urethane material on the reverse side helps absorb impact and reduce volume.

PRACTICE PAD STAND

HS40TP

The HS40TP training pad stand can hold pads between 6 and 10 inch diameters. The rubber grips of the basket can also be reversed for holding smaller pads more securely. An extension pipe is included for when practicing standing up is desired.

-Height Adjustment Range
w/o extension pipe: 582 – 732mm (23" – 28 3/4")
w/ extension pipe: 848 – 990mm (33 3/8" – 39")
*Measured from the top surface of a 10 inch training pad to the floor
